## User Experience Engineer II

 / JULY 2018 - PRESENT

Developing and leading prototyping projects with designers and researchers to support design explorations and user studies for the Google Cloud Platform design system. Working with a team of UXEs to maintain a framework for fast prototyping and building tools to support design system teams across Google.

## Software Engineer

 MICROSOFT / JULY 2014 - OCTOBER 2015

Worked with a team of software developers and program managers to create and maintain WCF and Azure REST services for a master data management system storing organization and individual Identity data. Developed and optimized API services for bulk and single-row CRUD transactions.
